

## Lansing Board of Water & Light

# Rate Schedules

### STEAM ENVIRONMENTAL CHARGE

The Environmental Charge permits the recovery of environmental remediation expenses incurred as a result of supplying steam. All residential, general service, and industrial rates are subject to the Environmental Charge. The following definitions and procedures will be followed in administering the Environmental Charge.

#### Definitions

**Environmental Charge** – The amount per kWh by which the applicable rates shall be billed in each month.

**Environmental Remediation Costs** – Costs incurred as a result of environmental restoration projects.

#### Procedures

The Environmental Surcharge shall be applied to each kWh billed to applicable rates. Environmental Charge revenues will offset environmental remediation costs and associated PILOT expense. The Environmental Charge shall be billed until environmental remediation costs are equal to zero. Should the Environmental Charge collect revenues in excess of environmental remediation costs, the difference shall be refunded to the applicable rates.

The Environmental Charge shall be reviewed and revised periodically in accordance with the provisions of this schedule.

**Environmental Charge** – The current Environmental Charge is **\$0.10/Mib**

Adopted: March 26, 2009

Effective: May 1, 2009
