

RENEWABLE ELECTRIC ENERGY RIDER

Nature of Service: The BWL will provide green power to system per the participant enrollment, however, the BWL does not guarantee that the actual electricity delivered to each participant's facility at any specific time will be produced from a green supply resource.

Availability - This rider is available to customers making use of any BWL Electric Rate Schedule.

Monthly Rate – Customers electing this premium service option will receive an additional charge for monthly energy of up to \$7.50 per month for each kWh block of electricity they choose to purchase under this rider. Actual prices will be published each November and will be based on the expected additional cost of renewable resources and other renewable/conservation programs for the upcoming year. The amount of kWhs in each kWh block will be based on the availability of resources that the BWL is able to secure. Participation will be limited to the amount of resources that the BWL is able to secure.

Minimum Bill: If the participant's actual monthly consumption is less than the kWh block in the contract, the participant will be charged for the full month's premium.

Term and Form of Contract: All participants for this service under this rider will require a written contract stating the number of blocks, block size and the specified period of time in which they will be enrolled.

Adopted: August 22, 2000

Effective: January 1, 2001
